

## nobilia Collection 2018. nobilia X – Expanding the limits

### More storage, more comfort, and plenty of new features in trending metal and stone finishes

Verl. Living up to the motto “nobilia X – Expanding the limits,” nobilia presents a new unparalleled collection and once again raises the bar in terms of design, storage space, convenience and functionality. Among the highlights of the new collection are the new **XL height base and tall units** as well as the innovative **Xtra worktop**. For even more creative freedom and planning scope we have added **9 new fronts, 5 more Color Concept colours and 11 new worktop décors** – among them many concrete, stone and metallic finishes. The **15 new upright panel colours, 19 new handles and plenty of new features for elements and accessories** enable modern and inviting kitchen compositions with great attention to detail.

#### **XL. Storage space redefined.**

The star of the new nobilia 2018 collection is called **XL**. nobilia redefines storage space with the new **XL height** in base and tall units. Nowadays people are growing taller. While at the same time, living spaces are getting smaller – especially in urban settings. For this reason, many buyers are very concerned about efficient storage space and ergonomics when planning their new kitchen.

With a **carcase height of 792 mm** in base units, **XL** offers roughly **10 percent more storage space**, and thus, even more possibilities for accommodating kitchen utensils and supplies. Moreover, the **XL height** also benefits the user by forming a perfect synthesis between ergonomic and storage needs.

**Matching XL highboards and tall units** maintain the harmonious overall look with continuous lines. With the new **XL format**, a total of more than **500 additional elements** for storage-oriented designs are available.

#### **Xtra. The new generation of worktops.**

nobilia expands the range of worktops with a new innovative product – **Xtra** – and with it, defines a whole new level of value in worktops.

**Xtra** worktops captivate with their very distinctive 3D surface texture, which creates an authentic looking natural stone appearance. **Xtra** worktops are available in three attractive natural stone finishes. Matching upright panels and niche cladding supplement the possibilities for surround designs in natural stone appearance.

The **Xtra** worktop also impresses in terms of function. The **Xtra** worktop panel has a multi-layered structure. An extra thick laminate combined with an innovative functional layer provides many advantages: The worktop is significantly sturdier, and more resistant to impact as well as to water penetration and swelling than a conventional worktop. These material properties even enable flush mounting of sinks and hot plates since the milled-out portion is in the functional layer.

### New fronts and colours

With 9 new fronts, 5 Color Concept colours and 11 new worktop décors nobilia opens up even more possibilities for trendy, design-oriented and elegant kitchen creations – from inviting to practical, from urban chic to classic and from entry price level to the high-end segment.

Cool concrete and ceramic décors as well as glamorous metal-look finishes continue to lead the trends and are thus well-represented throughout our new collection.

In the entry price level, **Speed in Ceramic grey reproduction** supplements this material trend with an appropriate décor in price group 1. Matching worktops, upright panels and plinth panels allow for a homogeneous design of the entire surround.

**Concrete Slate Grey reproduction** was added to the Color Concept already last year. Due to popular customer demand, this décor is now also a front décor in the **Riva** series and thus available for planning entire kitchens in price group 2.

**StoneArt** is a new range in laminate design that embodies the trend toward large-sized stone finishes. Thanks to its special three-dimensional surface, **StoneArt** turns the décor **Grey slate reproduction** into a front with exceptional aesthetics. The trend toward rustic – yet refined – surfaces gets a contemporary update in the large format dark stone décor dappled with a lighter colour. Upright panels and worktops in the new design **Xtra** are available to match **StoneArt**. This allows for a harmonious and consistent presentation of the new natural stone aesthetic.

Moreover, **Color Concept** is ideal for combining with metal and stone look finishes. Three new colours provide creative leeway here: The used look of **Rusty Plates** infuses this kitchen with rugged charm, the stone décor **Caledonia** brings exciting accents in shades of grey and **Oriental** adds an elegant glamour factor with its nuances of bronze and gold.

In addition to these variants, there are also two new wood décors to supplement the Color Concept: **Havellend oak reproduction** lends kitchens a warm and cosy ambience, while the décor **Timber oak reproduction** stands for striking wood accents that embody comfortable conviviality.

If you would like to take the professional look of your kitchen to the next level, then our new **Metal Concept** décors are right for you. The décor **Scratched steel reproduction** contributes the stainless steel component to the character-defining look. The used look character of the finish is intentional and brings a hint of workshop chic and industrial charm in the kitchen.

The décor is extremely versatile, as wall unit fronts, upright panels, niche cladding or as panels, and it combines beautifully with all solid colours, stone and concrete décors, even with wood décors.

Lacquer fronts continue to be a bestseller. Fronts with matt finishes are especially popular and nobilia adds four new ones to this segment.

**Fashion** is also available in the top-selling colours **White** and **Ivory**. The colours **Ivory** and **Black** enhance the **Sylt** range of framed fronts in matt lacquer. The Black front design is aimed particularly at a young, design-savvy target group that favours a contemporary and unexpectedly new cottage style look.

Additionally, **Sylt** gets its own new **pilaster surround** in all three front colours. There is also an addition to the framed front **York**. The genuine wood range from price group 9 was expanded with the colour **Ivory**.

### The surround

With 11 new worktop décors it is even easier to incorporate all the current trends. The offerings include the 3 Xtra décors and the 5 new Color Concept décors. Add to this reproductions in Ceramic grey, Limestone and Oiled oak. Moreover, nobilia also presents 15 new upright panel colours, 2 new upright systems and 19 new handles. And 7 new niche claddings with trend motifs such as brickwork or metal-look finishes are ideal ingredients for furnishings with loft appeal.

### Liveable designs

Kitchens are becoming more liveable – akin to the rest of the home – and the boundaries between cooking, dining, and living areas more fluid. This development is reflected in the new nobilia collection in the form of manifold homely design elements. Inviting and playfully lighthearted designs are easy to create, for instance, with the new **wall unit system with sliding doors**. It can be freely designed and enables a multiplicity of custom solutions.

The new **Panorama top sections** for sideboard designs – they come standard with lighting – also offer fascinating possibilities. With their glass top section, the elegant glass cabinets are the perfect place to highlight your favourite beautiful objects. The new base units with **tablar pull-outs** for base and hot plate units bring effortlessness to kitchen design and enable quick access to cooking utensils. With panels in contrasting colours they are also real eye-catchers. And there is room for the home bar – which is making a comeback – in the new **bar flap wall units**.

More transparency and airiness can be achieved with the new glass design front **Frame** and the new matt glass colours for **Gap**. Modern kitchen architecture also benefits from the new **wall units with flap** and the newly designed **roll-up front units**. In addition, integrated **LED lighted designs for upright panels** provide effective ambient lighting. The storage space in base and tall units is made even more practical with the new **door shelves**.

The range also includes the coordinating electric appliances and sinks for **flush mounting** in the new **Xtra** worktops. Together with our factory-milled cut-outs for flush mounting, retailers benefit from yet another complete solution from a single source. With this, nobilia again expands its competitive ability as a full-service provider.

The nobilia 2018 Collection is available as of October 01, 2017.  
XL height kitchens are available as of January 01, 2018.
