

nobilia Collection 2022.
Our passion. Your solution.

Innovative products, exclusive new features and multi-room solutions

Verl. In its 2022 collection under the motto Our Passion. Your solution. nobilia focuses particularly on innovative products, exclusive new features and multi-room solutions. More than ever, our homes have become the centre of our lives and a place to seek comfort and well-being. Particularly the kitchen has grown in importance as a social and communicative centre, as the heart of our home.

Based on the customers' desire for cosy, feel-good designs, nobilia's new features are characterised above all by the natural feel and appearance of the décors. Moreover, nobilia presents intelligent and innovative storage solutions, smart features and modern redesigns of traditional spaces such as the utility room.

The new front colours and décors of the 2022 collection are inspired by natural colours and materials. Colours range from a warm Volcanic grey to uni-coloured surfaces in Mineral green and Fjord blue all the way to a timeless Slate grey. The range of wood reproductions has been expanded with Oak Montreal, a remarkably authentic looking wood décor with a natural appearance. A sand-coloured concrete décor and an elegant, white matt glass appearance design complement the range of fronts.

In its move to a new grid system, nobilia has taken the obvious next step of introducing a new wall and tall unit height. The new wall unit is 792 mm high, representing a symmetrical counterpart to the XL height for base units. Coordinated tall unit and dresser unit heights round off the new line layout.

Moreover, the new nobilia collection has plenty to offer in the worktop segment, above all fashionable natural designs and exciting innovations. Three new décors add to the already wide range of designs. The newly added segment of quartz worktops has also been expanded with two new décors.

A new addition to the product range is Xtra Ceramic, a ceramic worktop with an innovative and patented material structure. Xtra Ceramic is available in five different décors, which look great when combined with the existing nobilia colour range. The innovative ceramic worktop is characterised in particular by its natural appearance, usability and impact-resistant design edge.

Seven new handle designs, eight new upright panel colours and a new colour concept for shelf units complement the expanded range of surround designs. In addition, the 2022 collection includes countless new features for units and accessories. Access doors, sliding door systems and solutions for wardrobes and shoe cabinets permit new storage space designs and modern planning options for utility rooms or other adjacent rooms.

Fronts and colours

Seven new fronts create a warm and modern ambiance. Attractive wood designs, colours and materials inspired by nature such as matt glass and concrete define the new collection. These options permit even more individuality in home design.

The new **Volcanic grey** adds a gentle warm hue to the previously available range of dark grey colours in the **Laser** product range. It is perfect for creating a fashionable yet natural look, particularly when combined with Concrete Terra Grey or wooden hues.

Demand for concrete in interior design remains unbroken. **Riva in Concrete Sand reproduction** seamlessly closes the gap to warm, softer hues, creating an urban and timeless ambiance. With these designs, nobilia now offers five different concrete hues.

The successful ultra matt lacquered laminate range **Easytouch** with its convenient anti-fingerprint properties has also been expanded with two soft, minimalist colours in this collection. In response to the ever-present desire for more tranquillity and subtle colours, Easytouch is now available in **Mineral green** and **Fjord blue**. The subtle beauty of Mineral green makes it perfect for combinations with other shades. It exudes an attractively calming ambiance, particularly when combined with other natural materials. Fjord blue will stun customers with its minimalist natural clarity and looks particularly elegant when combined with gold-coloured elements. These colours are perfect for a modern interior with a natural feel.

The new lacquered laminate front **Natura** in **Oak Montreal reproduction** features a remarkably authentic and natural look. The feel of the front is also impressive as its texture is barely distinguishable from real wood. This front is a strong response to the demand for more natural designs. In addition, the front has practical anti-fingerprint properties, making it a perfect combination of design and usability.

The modern and popular framed front **Nordic** is now also available in the timeless colour **Slate grey**. Moreover, an entire cottage style range consisting of cornices and pilasters and a new modern framed glass door with a horizontal division have been added to Nordic. Now nothing stands in the way of creating a subtle and modern cottage style.

Moreover, we have added another alternative to last year's program highlight **Artis**: the **Alpine white matt glass appearance** offers a beautiful interplay of matt surfaces and three-dimensional edge technique. This gives **Artis** fronts an exclusive and unique look.

Attractive surround designs

Seven new handle designs, eight new upright panel colours and a new colour concept for shelf units complement the expanded range of surround designs. The fine contours of the new bevelled shelf units and wall shelves contribute to elegant and subtle lines in the interior design.

The new nobilia collection has plenty to offer in the worktop segment, above all fashionable natural designs and exciting innovations. Three new décors, **Oak Montreal reproduction, Concrete Sand reproduction** and **Vikings Oak reproduction** add to the already existing diversity. The newly added segment of **quartz worktops** has also been expanded with two new décors – **Quartz Epic Easy Clay** and **Quartz Epic Ash Grain**.

Xtra Ceramic – Meets even the toughest demands.

A new addition to the product range is **Xtra Ceramic**, a ceramic worktop with an innovative and patented material structure. This product developed in-house by nobilia features a natural appearance and exceptional usability. The worktop and niche thickness of 16 mm is achieved through bonding of a real ceramic panel with a support panel made of recycled waste glass. This gives **Xtra Ceramic** a relatively low weight, making it easy to install. In addition, the worktops and niches have impact-resistant design edges.

Xtra Ceramic is characterised by its high-quality appearance, is waterproof even without a separate waterproofing process, and has a non-porous, easy-to-clean and hygienic surface. Its special aesthetic qualities and pleasant feel make it suitable for both kitchens and bathrooms. Xtra Ceramic – like the Xtra worktop – permits flush mounting of hot plates and built-in sinks. **Xtra Ceramic** is available in **Plain Black, Belgian Blue Stone reproduction, Concrete Satin grey reproduction, Concrete White reproduction** and **Concrete Sand reproduction**.

Everything from one source! This basic principle also applies to the Xtra Ceramic worktop. Worktops and niches are supplied in a single process along with the entire consignment within the standard delivery time. This simplifies the process significantly for retailers.

New features in detail

In its move to a new grid system, nobilia has taken the obvious next step of introducing a new wall and tall unit height. The new wall unit is 792 mm high, representing a symmetrical counterpart to the XL height for base units. Coordinated tall unit and dresser unit heights round off the new line layout.

In addition, the 2022 collection includes countless new features for units and accessories. Access doors, sliding door systems and solutions for wardrobes and shoe cabinets permit new storage space designs and modern planning options for utility rooms or other adjacent rooms.

Sign Emotion. Beautiful and tidy.

The modular railing system **Sign Emotion** offers comprehensive options for kitchens, bathrooms and living rooms. Shelves of different widths and heights and the extensive range of accessories turn Sign Emotion into a flexible universal talent that seamlessly combines storage space and design. Exciting accessories for digital use such as an adapter for the Teufel MUSICSTATION, a tablet holder or a distributor box are part of the system just like convenient solutions for bathrooms and kitchens, for instance a hair dryer holder, a magnetic knife strip or an elegant wine glass holder. All elements of the aluminium system can be attached and detached at any point and remain movable along the rail. The system is exclusively available through nobilia, in Black or Stainless steel appearance. An optional lighting system for the railing is also available.

New and exclusive.

The global innovation **GROHE Blue Red in one** will be presented for the first time, exclusively at nobilia. The innovative water system combines the properties of the established systems GROHE Blue and GROHE Red in one appliance, supplying a total of five types of water: Filtered and cooled drinking water in non-carbonated, medium or carbonated, boiling hot water at 100°C at the push of a button or normal tap water, both cold and warm – GROHE Blue Red in one meets all demands. nobilia is the only kitchen manufacturer to receive a limited number of units for advance sale prior to the official launch in April.

Yet another highlight of the 2022 collection: In collaboration with the famous food blogger **Sally**, nobilia is now offering the exclusive **Bosch oven HBG 5780 B 6**. The exclusive appliance is equipped with a pyrolysis function and Home Connect technology and can be linked directly to the app “Sallys Welt”. This means 1,500 recipes for baking and cooking can be sent directly to the oven to set the appliance to the correct temperature and heating settings.

Bathroom and living room

The bathroom and living area segments have been expanded significantly once again for 2022. New unit depths, additional Midi units and shelf solutions have been added to enrich the unit range available for both of these areas. In the bathroom segment, new taps and washbasins, convenient storage solutions and mirrors have been added to the range of available accessories.

A new plinth foot and a high-quality leather handle create highlights with personality in the living room segment. As a supplement for freely planned living room concepts, the independent sideboard range Solo is sure to impress. The attractive product range contains pre-configured sideboard solutions that can be sold and ordered in retail without extensive planning effort.

The nobilia 2022 Collection is available as of October 01, 2021.

nobilia in-house exhibition 2021

The nobilia in-house exhibition will take place September 18-26, 2021 on site in Verl. As before, visiting the exhibition will only be possible by appointment this year. To register online, visit the nobilia exhibition portal at hausmesse.nobilia.de.
