

DIY WITH NOBILIA

TEMPLATE FOR THE MINIATURE „NOBILIA®“ TRUCK

nobilia®

WHAT YOU NEED

- » 2 sheets DIN A4 (standard printer paper or craft paper 130 g/m²)
- » Scissors
- » Paper glue or glue stick

MINIATUR- „nobilia®“-TRUCK

The cute miniature „nobilia®“ truck is really easy to make, and great fun. And if you like, you can even upgrade the loader. You might want to colour it with crayons or felt tips.

HOW TO DO IT

- 01.** Print the template for the truck on standard paper. Depending on the grammage your printer allows, you can also use thicker paper (130-160 g/m²). This will make the model more stable. Of course, you can also use standard printer paper of 80-90 g/m².
- 02.** Cut all 4 individual parts out along the outlines.
- 03.** Fold along the broken lines.
- 04.** Apply glue to the adhesive tabs and assemble the individual elements. It's best to start by sticking A to A and finish gluing this side before going to the other side and gluing B to B, and continuing on that side.
