

DIY WITH NOBILIA

AROMATICALLY SCENTED CANDLES

nobilia[®]

WHAT YOU NEED

- » Heat-resistant container (preferably made of glass)
- » Candle wax (candle stumps or wax granules)
- » Wick
- » Aroma oil (as preferred)
- » Saucepan
- » Bain marie
- » Scissors to shorten the wick

AROMATICALLY SCENTED CANDLES

WHETHER RESTRAINED OR BURSTING WITH COLOUR – THESE CANDLES SPREAD A WONDERFUL FRAGRANCE

Calming aromas are in the air, you can relax. This sense you have in your home comes from homemade scented candles that grace your own four walls either with a splash of colour or in restrained simplicity. Needless to say, they also make a perfect gift!

METHOD

- 01.** Pour some water into a large saucepan and heat over a medium flame.
 - 02.** Put the candle stumps/wax granules in a small heat-resistant bowl and place it in the bain marie.
 - 03.** Once the wax has melted, add a few drops of the aroma oil and stir thoroughly. Be careful: use the fragrances sparingly, a few drops will suffice!
 - 04.** Remove the saucepan from the stove and pour the wax and aroma oil into the heat-resistant container.
 - 05.** Now, carefully place the wick in the middle and leave the hot wax for several hours to cool and set.
 - 06.** If you want, you can also decorate your candle. Whether with glitter or dried flowers, let your imagination run free. Let the candle dry for a while so the decoration takes hold.
 - 07.** Finally, take the scissors and shorten the wick as appropriate..
- TIP:** you can find wax granules in good garden centres, drugstores or on the Internet.

YOU NOW HAVE A HOMEMADE SCENTED CANDLE!
