

DIY WITH NOBILIA

CLEANING GOLD JEWELLERY

nobilia[®]

THIS IS ALL YOU NEED

- » Bowl
- » Washing-up liquid
- » Baby toothbrush
- » Microfibre cloth

CLEANING GOLD JEWELLERY BRINGING BACK THAT ORIGINAL SHINE IN JUST A FEW EASY STEPS

Do you have other jewels besides your nobilia kitchen? If these include valuable gold jewellery, you should clean it every now and again. In just a few easy steps, we are now going to explain how you can restore its radiance at home!

METHOD

- 01.** Fill a bowl with lukewarm water and a few drops of mild washing-up liquid.
- 02.** Place your gold jewellery in this solution and wait about 15 minutes.
- 03.** Now take the toothbrush and, with it, carefully clean the jewellery. Make sure you use a soft toothbrush so that nothing gets scratched. A baby toothbrush is the ideal choice for this.
- 04.** Now rinse the jewellery with plain water to remove any soap residue.
- 05.** Finally, polish everything with a microfibre cloth.

Wearing your gold jewellery, you can now shine out again!

NOTE: This method is only suitable for gold jewellery that is not set with stones or pearls. If it is, we recommend taking it to a jeweller.
