

DIY WITH NOBILIA

DECORATIVE FLOWER BOX

nobilia[®]

THIS IS ALL YOU NEED

- » Decorative box
- » Floral foam brick (available from florists)
- » Transparent film
- » Scissors
- » Approx. 15 tulips or roses, depending on size of box

DECORATIVE FLOWER BOX

Are you still looking for something that's a little bit special to welcome spring into your home? Then why not simply bring the season of joy and colour into your kitchen with our beautiful flower box!

METHOD

- 01.** Completely line the box with the transparent film so it comes partly up the sides.
- 02.** Cut the floral foam brick to shape so it completely fills out the base of the box. It should come about half way up, leaving the flower heads peering over the box edge.
- 03.** Carefully pour sufficient water onto the foam to moisten it thoroughly. Wait until all of the water has been absorbed, adding a drop or two more if need be.
- 04.** Shorten the flower stems to a length of about 5-6 cm, depending on the height of the box.
- 05.** Now you can insert the flowers into the floral foam. The best way is to work your way from the outside in – so start by filling the outer edge, then continue with the next row and so on until you reach the centre. Try not to leave any gaps.

THAT'S ALL THERE IS TO IT!
